REDUCE, REUSE, RECYCLE... RELOC
 RELOC products are a greener solution than traditional wiring. RELOC products minimize installation time and construction waste while maximizing productivity, reusability and the use of recycled materials.
 Visit www.acuitybrandslighting.com/sustainability for more information.

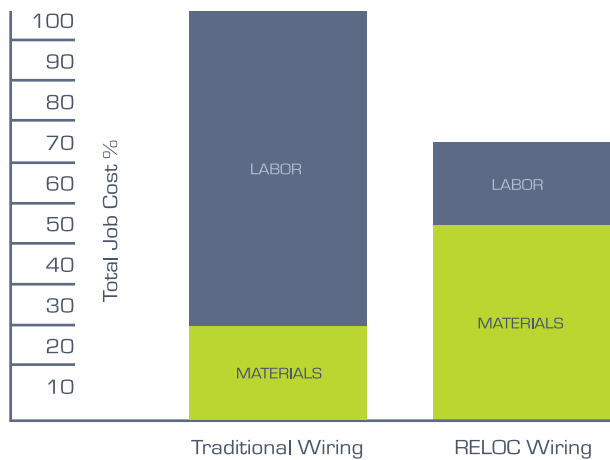

From the brand that invented modular wiring, an industry-first innovation, that allows modular wiring to cover the most demanding low and high temperature environments. Now you can extend RELOC savings to cooler and freezer applications with OnePass® EXTREME.

Applications

Lighting and power wiring in facilities with long-term exposure to extreme temperatures:

- Warehouse coolers and freezers
- Food distribution
- Unheated facilities

RELOC wiring offers the lowest total job cost compared to traditional wiring methods.

Quick and Easy Maintenance and Relocation
Complete wiring changes quickly and inexpensively by using RELOC components. Simply unplug the original system, relocate the fixtures and reconnect the system. Quick changes minimize facility down-time.
