

The traditional style that you recognize with LED performance that might surprise you.

Acuity Brands brings you the customary clean look of the Trilume form, made exceptional by optimized LED performance and intelligent but simple controls in a modernized sleek design.

- Specify the side-light ambient option for reduced-glare and improved comfort
- Empower both the patient and caregiver with smooth, flicker-free dimming control of ambient and high-intensity exam lighting
- Easily integrate the networked control system with traditional patient room controls

Acuity Brands makes it easy to specify patient room lighting that meets recommended levels for patient and caregiver, with the added value of simply-integrated networked controls.

Features:

- Optimized for energy-efficient LED source to deliver recommended light levels with reduced energy consumption
- Smooth, seamless, flicker-free dimming to 1% enabled by eldoLED® constant current drivers – both ambient and exam lighting
- Optional side-light (indirect) ambient mode with glare-free (direct) exam mode
- Digital control technology of nLight® combined with analog technology of sequential switching
- Network occupancy sensors, photocells, and wall stations with traditional patient bedside controls
- Independently tested to meet NSF2 industry standards
- Hinged door with sanitary lens, standard
- IP65 pending
