Acuity Brands is Ready

Buy American

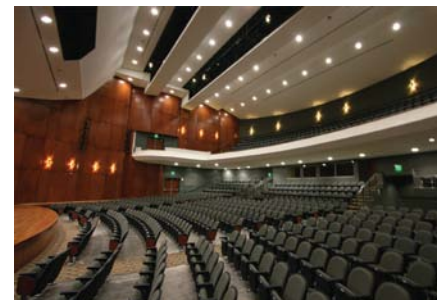

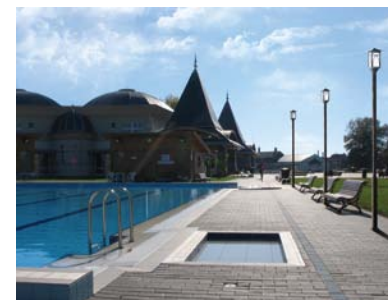

American Recovery and Reinvestment Act

In addition to having products and services that make **Acuity Brands** the obvious choice for your lighting-upgrade projects, our channel partners are **General Services Administration (GSA)** schedule-listed, with lighting products and controls in complete compliance with **Trade Agreement Act FAR Part 25.4**. We have lighting products and controls that meet the

"Buy American" procurement preferences outlined in Sections 10 (a-d) of Title 41 of the United States Code. And, we offer application and design assistance to meet local and national codes, as well as the **Illuminating Engineering Society (IES)** guidelines. Look to our trained Government Account Managers to assist you with your specific needs.

Responding to the **2009 American Recovery and Reinvestment Act, executive orders, and LEED-certification** requirements, leading government agencies are implementing important energy-saving measures. They are leading the way to replace standard lighting with more energy-efficient lighting integrated with controls. To meet similar goals for your property, look to **Acuity Brands** to learn more about the latest technology, and for help in selecting the right lighting and controls to save energy and achieve LEED certification.

Because it accounts for 35% to 40% of energy use in a building, lighting stands at the center of targeted upgrades. Acuity Brands has all you need to move forward, including energy analyses and payback calculations on lighting upgrades so you can prove positive results from all your energy-saving efforts.

Lighting products from Acuity Brands incorporate a variety of energy-efficient light sources – LED, induction, fluorescent or HID – and advanced control systems for daylighting and other important energy-management strategies.

We support our breadth of product with strong technical and post-sales assistance, plus competitive pricing and outstanding logistics. And, having the industry's strongest sales and distribution network in the industry means we efficiently solve the practical, aesthetic and economic challenges of your lighting design, installation, commissioning and management.
