## FEATURES AND SPECIFICATIONS

### INTENDED USE

For field or factory installation in T5, T5HO and T8 fixtures utilizing low-profile ballast and wireways. Suitable for indoor and damp locations and for sealed and gasketed fixtures, including fixtures rated for wet locations. Provides 90 minutes of emergency operation at a reduced light level.

### CONSTRUCTION

Galvanized steel, low-profile housing works in conjunction with low-profile or standard size electronic ballasts to convert new or existing standard or high output T5 fluorescent fixtures into emergency lighting. Dual-voltage input capability (120V or 277V).

### PERFORMANCE

Operates one 14-28W standard or 24-54W high output T5; one 32W(4'), 40W(5') and 44W HO(4') T8 fluorescent lamp; or one 36-55W (4-pin) long compact fluorescent lamp. Compatible with most one, two, three or four-lamp electronic, standard, energy-saving and dimming AC ballasts.

Battery pack wires two ways: on night light circuit (permanently energized) or on switchable circuit (unswitched circuit to battery charger and switched circuit to the fixture ballast). Battery pack will strike "normally off" lamp. Produces 425-825 lumens initial emergency light output.

### BATTERY

Sealed, maintenance-free, high-temperature, nickel-cadmium battery. Ensures long life over wide temperature ranges. Automatic battery recharge after 90-minute discharge. 24-hour recharge time.

Pilot light and single-pole test switch provide visual and manual means of monitoring system operation.

### ELECTRONIC

Constant current-type charger. High-efficiency, push-pull inverter is the most effective method of converting DC power to AC power. It provides maximum light output, battery life and reliability.

### INSTALLATION

- Low-profile size (18.5"L x 1.18"W x 1.18"H) allows mounting in lighting fixtures with limited space inside fixture wireway for clear appearance and protection against vandalism. Mounting centers 17".
- Test switch and pilot light included.

## Low-Profile Fluorescent Emergency Ballast Damp Location Listed

# PSL550

H - 1.18"  
W - 1.18"  
L - 18.5"

### LISTING

- UL Listed. Suitable for factory or field installation in indoor dry and damp locations and sealed and gasketed fixtures including fixtures rated for wet locations.
- Temperature rating 32°F (0°C) to 122°F (50°C).
- Meets UL 924, NFPA 101 (Current Life Safety Code), NEC and OSHA illumination standards

### WARRANTY

Three-year warranty.

## ORDERING LOGIC

Lead times will vary depending on options selected. Consult with your sales representative.

### PSL550

<b>Designation</b>
--------------------

**PSL550** Low-profile emergency ballast standard and high-output T5 lamps and 4' T8 lamps

<b>Accessories*</b>
---------------------

Order as separate item.  
ELA RTS3 Remote test switch pilot light

\* See Inverter Accessories specification sheets for details on other compatible devices.

### Example: PSL550

# PSL550 Low-Profile Fluorescent Battery Pack

## SPECIFICATIONS

### BATTERY

Sealed Nickel-Cadmium

Voltage	Shelf life <sup>1</sup>	Expected life <sup>1</sup>	Maintenance	Optimum temperature <sup>2</sup>
3.6	3 years	7-9 years	none <sup>3</sup>	32-100°F

Notes:

- 1 At 77°F.
- 2 Optimum ambient temperature range where unit will provide capacity for 90 minutes. Higher and lower temperatures affect life and capacity. Consult factory for detailed information.
- 3 Periodic system status test recommended.

## MOUNTING

-All dimensions are inches (millimeters).

Cross section end view  
Length: 18.5" (470)  
Shipping weight: 2.3 lbs.

## ELECTRICAL

Volts	Maximum AC input	
	Amps	Watts
120	.18	2.5
277	.18	2.5

## LAMP COMPATIBILITY

Lamp Type	Wattage
T5	14-28
T5 HO	24-54
T8	32(4')-40(5')
T8 HO	44(4')
Long compact (4-pin)	36-55

Partial listing of lamps operated.
