

Acuity Brands® Professional Services

One Company. One Promise.

Professional Services from Acuity Brands provide a complete portfolio of solutions to enable your smart lighting project all managed by one company. We offer our expertise throughout the project lifecycle and make doing business with us valuable and easy.

Our total lighting solutions provide modern, energy-efficient products and customer-focused services that enable adoption of smart LED lighting, controls, building management, and Internet of Things solutions. Throughout the implementation phase of your project, our project management team is connected with the factory supply chain and field service professionals, ensuring you get seamless execution of your project. Post implementation, our annual or multi-year service plans ensure your system is working the way you want. Acuity Professional Services provides the right solutions no matter the size or complexity of your project.
