nLight Lighting Controls Platform

It's not just smarter. It's easier.

nLight is a sensor-based digital lighting controls solution that offers wired and wireless lighting controls that easily connect luminaires, sensors, and other control devices to create a digital network. The nLight platform of products enables ease in specification, installation, and ownership, making it the go-to digital lighting controls platform for specifiers, contractors, and building owners.

About IECC 2015
The International Energy Conservation Code (IECC) 2015 is a residential and commercial building energy code. The IECC has been adopted by many states and municipalities. The intention of this code is to reduce energy consumption by outlining design and construction requirements which include specific constraints for lighting controls. The use of lighting controls to synchronize light levels with daylight, occupancy, and scheduled/manual inputs are required in order to be compliant.

About This Guide
Acuity Brands® offers the nLight® IECC Applications Guide as a reference of typical nLight layouts that help make code compliance quicker and easier. The Acuity Brands Design Services Team is also available to support engineers and contractors with detailed design, submittal, and installation. For additional information, please contact your Acuity Brands Sales Representative.

About nLight
nLight® is a sensor-based digital lighting controls solution that offers wired and wireless lighting controls that easily connect luminaires, sensors, and other control devices to create one digital lighting controls platform to aid in code compliance, reduce energy, and enable advanced networked capabilities. Ideal for practically any application, small to large, indoor to outdoor, nLight offers lighting controls that scale from one room to an entire floor, from one floor to an entire building, from one building to an entire campus.
The chart below is an overview of the Code Requirements for Common Building Spaces. Please use this information as a guide. For specific code requirements please refer to the IECC code.

</tr>
<tr>
<td>Exterior Lighting Controls</td>
<td>C405.2.5</td>
<td>Lighting for exterior applications other than emergency lighting that is intended to be automatically off during building operation.</td>
<td>✓ ✓ ✓ ✓ ✓</td>
</tr>
<tr>
<td>Exterior Lighting Controls</td>
<td>C405.2.5.3</td>
<td>Lighting shall automatically reduce connected lighting power by not less than 30% from no later than midnight to 6 am for one hour after business closing when occupancy has not been detected for longer than 15 minutes</td>
<td>✓ ✓ ✓ ✓ ✓</td>
</tr>
</tbody>
</table>
For each space type there will be a wired solution on the left and wireless solution on the right.

Room description

Room layout with devices & locations

Room layout diagram with control, fixture, and wiring type detail

Required list of devices in order to implement room layout design above

Operational details describe the functionality provided by the equipment specified in the solution

Additional options that add control capacity beyond code requirements

Notes:
* This summary is for general information purposes only and is provided without any warranty as to accuracy, completeness, or otherwise. The user should read the applicable code sections for more complete and detailed descriptions of code requirements and exceptions and should consult with a professional engineer or other competent advisor before making any decision or taking any action based on this summary.
** While energy code is required, safety may preclude the use of a manual controls in these spaces.

*ADDITIONAL OPTIONS:*
- Light Fixtures: All fixtures are dimmable, can be controlled together or independently, and maximum level can be task tuned to any percentage via programming.
- Occupancy Control: Fixtures must be turned on manually (or optionally can be configured to come on automatically to 50%). Fixtures turn off automatically when room becomes vacant.
- Daylight Control: Not required for offices without windows or that have loads <150W in sidelight zones.

*ADDITIONAL OPTIONS:*
- Room can be connected to nLight backbone to enable network control or time schedules (C405.2.2.1 - Time-Switch Controls), and also qualify for Enhanced Digital Lighting Controls (C406.4).
- HVAC control available through system-wide BACnet® interface option on the ECLYPSE® controller.
- Wireless fixture embedded control and occupancy/daylighting sensor options available, please see the fixture specification sheet.

*Note: Contact your local lighting agent for more information on nLight enabled fixtures.*

OPERATIONAL DETAILS:

**Light Fixtures:**
- All fixtures are dimmable
- All fixtures are controlled together or independently
- Maximum level can be task tuned to any percentage via programming

**Occupancy Control:**
- Fixtures must be turned on manually (or optionally can be configured to come on automatically to 50%)
- Fixtures turn off automatically when room becomes vacant

**Daylight Control:**
- Smooth continuous dimming
- Custom grouping of fixtures into separate daylight zones (max. number zones = number of fixtures)
- Not required for offices without windows or that have loads <150W in sidelight zones

**Manual Control:**
- On/off & raise/lower control of fixtures

ADDITIONAL OPTIONS:
- Room can be connected to nLight backbone to enable network control or time schedules (C405.2.2.1 - Time-Switch Controls), and also qualify for Enhanced Digital Lighting Controls (C406.4)
- HVAC control available through system-wide BACnet® interface option on the ECLYPSE controller or through occupancy sensor auxiliary relay (AR) contact option
- Wireless fixture embedded control and occupancy/daylighting sensor options available, please see the fixture specification sheet

Note: Contact your local lighting agent for more information on nLight enabled fixtures.

### OPERATIONAL DETAILS:

- **Light Fixtures**: All fixtures are dimmable. Maximum level can be task tuned to any percentage via programming. A/V zone can be programmed to control two fixtures in front of the whiteboard.

- **Occupancy Control**: Fixtures must be turned on manually (or optionally can be configured to come on automatically to 50%). Fixtures turn off automatically when room becomes vacant.

- **Daylight Control**: Smooth continuous dimming. Custom grouping of fixtures into separate daylight zones (max number zones = number of fixtures). Not required for areas without windows or that have loads <150w in sidelight zones.

- **Manual Control**: On/off & raise lower control of two zones of fixtures.

### ADDITIONAL OPTIONS:

- Room can be connected to nLight backbone to enable network control or time schedules (C405.2.2.1 - Time-Switch Controls), and also qualify for Enhanced Digital Lighting Controls (C406.4). Note: Max of 4 fixtures per controlled group.
- HVAC control available through system-wide BACnet® interface option on the ECLYPSE controller or through occupancy sensor auxiliary relay (AR) contact option.
- Wireless fixture embedded control and occupancy/daylighting sensor options available, please see the fixture specification sheet.

Note: Contact your local lighting agent for more information on nLight enabled fixtures.

Note: Contact your local lighting agent for more information on nLight enabled fixtures.

Operational Details:

- Light Fixtures:
  - All fixtures are dimmable
  - All fixtures are controlled together or independently
  - Maximum level can be task tuned to any percentage via programming

- Occupancy Control:
  - Fixtures must be turned on manually (or optionally can be configured to some on automatically to 50%)
  - Fixtures automatically turn off when room becomes vacant

- Daylight Control:
  - Smooth continuous dimming
  - Custom grouping of fixtures into separate daylight zones (max number zones = number of fixtures)
  - Not required for areas without windows or that have loads <150W in sidelight zones

- Manual Control:
  - On/off & raise/lower control of entire room
  - Teacher station with control of two zones
**CLASSROOM with 0-10V Dimming Fixtures**

### Wired

- **Operational Details:**
  - **Light Fixtures:**
    - All fixtures are dimmable
    - Each row can be controlled independently
    - Maximum level can be task tuned to any percentage via programming
  - **Occupancy Control:**
    - Fixtures must be turned on manually (or optionally can be configured to come on automatically to 50%)
    - Fixtures automatically turn off when room becomes vacant
  - **Daylight Control:**
    - Smooth continuous dimming
    - Daylight zones defined by rows
    - Not required for areas without windows or that have loads <150W in sidelight zones
  - **Manual Control:**
    - Master on/off & raise/lower control of entire room
    - Teacher station with control of two zones

- Maximum level can be task tuned to any percentage via programming

Occupancy Control:
- Fixtures automatically go to full bright when occupied
- Fixtures automatically turn off or optionally can be configured to drop to low dim setting when space becomes vacant

Daylight Control:
- Daylight responsive controls lights to full off when adequate daylight present

ADDITIONAL OPTIONS:
- Devices can be connected to nLight backbone to enabled network control or time schedules, including astronomical time schedules
- Wireless fixture embedded control and occupancy/daylighting sensor options available, please see the fixture specification sheet

Note: Contact your local lighting agent for more information on nLight enabled fixtures.

### Programmable Time Clock Control:

Although not pictured within each of the individual room design guides, each nLight controlled space can be connected via an nLight backbone to create a networked nLight lighting control system capable of meeting the requirements of IECC 2015 Provision C405.2.2.1, Time-Switch Controls. A networked system also enables astronomical time clock control.

### nLight Enabled Fixtures

Acuity Brands offers the industry’s broadest portfolio of controls enabled fixtures. Please scan the QR code to see the current nLight enabled fixtures.
## APPENDIX B: Requirements Overview

<table>
<thead>
<tr>
<th>Control Requirement</th>
<th>Code Provision</th>
<th>nLight Solution Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Manual Control</strong></td>
<td>C405.2.2.3</td>
<td>nLight WallPod devices provide a user with local control of lighting within an nLight controlled space. WallPods are available in multiple styles — each with varying features and user experiences.</td>
</tr>
<tr>
<td><strong>Time-Switch Controls (via System Controller)</strong></td>
<td>C405.2.2.1</td>
<td>Individual nLight control groups (i.e., rooms) can be easily networked together across an entire building simply by connecting them into a “backbone” made up of one or more nLight bridge devices and/or nLight AIR adapters and an nLight ECLYPSE system controller. The system controller provides programmable time clock functionality for an nLight network as well as interfaces to the SensorView suite of web-based software applications (via an Ethernet LAN / WAN connection).</td>
</tr>
<tr>
<td><strong>Full Auto-Off via Occupancy Sensor</strong></td>
<td>C405.2.1.1.1</td>
<td>nLight occupancy sensors utilize 100% digital passive infrared (PIR) detection, come in several mounting styles, and offer multiple coverage pattern options. Additionally, nLight sensors are available with patented Microphonics™ dual technology detection for rooms with obstructions. Configuring for full off vs. partial off control is done with system programming.</td>
</tr>
<tr>
<td><strong>Manual On, Auto-On &lt;=50%, Full Automatic On</strong></td>
<td>C405.2.1.1.2</td>
<td>nLight provides multiple options for controlling continuous dimming luminaires. This allows spaces with several lighting types and technologies to be controlled together and with a common user experience.</td>
</tr>
<tr>
<td><strong>Light Reduction Controls</strong></td>
<td>C405.2.2.2</td>
<td>Acuity Brands offers a wide variety of LED fixtures with factory installed integrated nLight controls that provide smooth continuous dimming.</td>
</tr>
<tr>
<td><strong>Daylight-Responsive Controls</strong></td>
<td>C405.2.3.1/2</td>
<td>nLight offers standalone daylight harvesting sensors as well as occupancy sensors with integrated daylight harvesting. Sensors are available in various housings and provide continuous dimming control of any/all networked nLight enabled fixtures or dimming relay packs, each capable of being its own daylight zone.</td>
</tr>
</tbody>
</table>

*Available with nLight Wired products only.

Note: This summary is for general information purposes only and is provided without any warranty as to accuracy, completeness, or otherwise. The user should read the applicable code sections for more complete and detailed descriptions of code requirements and exceptions and should consult with a professional engineering or other competent advisor before making any decision or taking any action based on this summary.

2015 IECC and Emergency Lighting

IECC lighting controls requirement C405.2 (and subsection 405.2.5 for exterior lighting controls) provides exceptions for emergency and egress lighting, indicating that lighting controls are not required for the following types of lighting:

- Areas designated as security or emergency areas that are required to be continuously lighted.
- Interior exit stairways, interior exit ramps and exit passageways.
- Emergency egress lighting that is normally off.
- Lighting for covered vehicle entrances or exits from buildings or parking structures where required for safety, security or eye adaptation.

Generally speaking, lighting that is normally on during occupied periods, normally dimmed or off during unoccupied periods, and also used to provide for egress during emergency power conditions should be controlled in compliance with C405.2. nLight features various UL924 listed options that can be specified to provide both lighting control in compliance with IECC and emergency operation in compliance with locally enforced fire codes.

Additional specification details and information can be found on the nLight platform webpage at www.acuitybrands.com/nLight.

Mobile Apps

Quick and Easy Lighting Configuration and Control In the Palm of Your Hand

nLight Wired

nLight BLE Radio Module
nLight wired uses the nIO BT (Bluetooth® Low Energy radio module) to communicate with the nConfig app to modify the settings and operation of the devices in an nLight zone.

nConfig™
The nConfig mobile app is for nLight wired controls startups. It's a quick and easy alternative to SensorView software for smaller projects and simple programming.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Acuity Brands Lighting is under license.

nLight AIR

CLAIRITY™ Pro
The CLAIRITY Pro mobile app allows you to start up, configure and troubleshoot nLight AIR wireless controls from a compatible smartphone or tablet.

**A+ Certified** solutions from Acuity Brands help you quickly and confidently select and implement lighting systems that are both compatible and consistent.

For lighting applications, A+ means verified consistent performance, visual appearance and system interoperability of all luminaires and controls within the certified solutions. For lighting professionals it means confidence that all parts of the lighting system will work together and meet common Acuity Brands specifications.

Go to www.acuitybrands.com/solutions/a-certified or contact your local Acuity Brands representative for more information.
