COLORS

POLYESTER POWDER COATINGS

Lithonia Lighting has expanded its Architectural Color offering. With over 200 colors to choose from, you are sure to find a color that will fit your aesthetic criteria. This broad selection offers both smooth and textured finishes.

Current powder coating technology provides polyester-based compound combining the flexibility, impact resistance and corrosion protection of epoxies with the weather resiliency normally associated with brittle acrylics.

Series 49 RAL colors are weather resistant TGIC polyester powder coatings. The finish is smooth glossy with an 80-90+

gloss level. Series 38 or other RAL finishes such as mattes or metallics will be considered custom-blended colors.

Additionally, Lithonia Lighting can match any custom color to a sample paint chip. A sample of the custom-blended finish will be provided by Lithonia for final approval. Lead times for these colors will be extended due to the custom match and approval process.

New, enhanced ordering logic now applies to architectural colors. To specify any of the colors indicated in this chart, simply add the Lithonia nomenclature or RAL number (i.e. RAL 3016) to your fixture nomenclature.
