

In an effort to improve the process of obtaining paint chips, we have added them to our ordering system with a cicode allowing you to order them as you need them. To do this log into Agile and submit an order using the cicode listed below. With these changes there will be a cost of \$1.00 per pack and it will be shipped by regular mail. You will want to request that it is shipped to your address to handle distribution to customers later.

*238EWC LLPPCS KIT U Lithonia Lighting PROPRIETARY PAINT CHIPS STANDARD

DNATXD	NATURAL ALUMINUM TEXTURED SUPER DURABLE
DSSTXD	SANDSTONE TEXTURED SUPER DURABLE
DWHGXD	WHITE TEXTURED SUPER DURABLE

This will create an order for the paint chips to be picked and shipped to you from the DC.

Once picked this order will be shipped to the address you have entered.

For those colors that have a RAL#, we will not have these colors available. You will be able to take this RAL# to any Sherwin Williams and they can make these colors allowing you to get a sample. We have decided to do this because these colors are very rarely painted and maintaining these was very costly.

We hope that these changes will make this process easier for you and help to create a standard process for obtaining these chips.
