

# June 2025

The Compact Pro™ High Bay (CPHB) with embedded occupancy sensor by nLight® drives optimal energy savings, and a clear return on investment for warehouses. Additionally, the nLight networked lighting control system supports BMS integration, remote lighting management, and even asset tracking providing incremental value beyond the initial installation.

Mark Lane  
Senior Director, Indoor Controls

Kelly Baten  
Product Manager, Linear High Bays

The CPHB's thoughtfully designed form factor offers convenient, easy installation without sacrificing performance or quality, making it the ideal solution for warehouse lighting. With a wide range of configurations, the CPHB can be tailored to individual warehouse needs, providing customers with the right luminaire, every time.
