

Methodik™

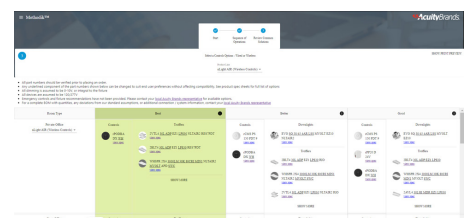

Sequence of Operations
Tool – Online, Fast, Free

Methodik is an online tool that generates a sequence of operations quickly, designed to save time and increase your productivity. The sequence of operations can export your project into .DXF, .PDF, and .CSV file formats to include in your electrical set. Additionally, it gives recommendations on products that can be used in each space—fixtures and controls side by side.

Features and Benefits

- **FAST** – generates a sequence of operations in 5 clicks
- **FREE** – available on the Acuity Brands website for anyone to access
- **CUSTOMIZE** – make additions and changes to the sequence of operations
- **EXPORT** – both the sequence of operations and product recommendations are exportable
- **AUTO-CHECK** – helps eliminate errors by only displaying compatible controls and fixtures
- **OPTIONS** – controls inside of your fixtures or standalone, you decide
