SPOTLIGHT ON: LIGHTING TAILORED TO HIGHER EDUCATION SPACES

Slot by Mark Architectural Lighting™

Combining a compact profile with unparalleled performance, the Slot 2 family creates simple lines of light. Make a bold statement with patterns or create lines of light with linear runs.

ENVEX™ by Lithonia Lighting™

A high-performance, visually comfortable, recessed ambient series designed to meet intense specification requirements with ease. Enrich any space without distracting from the beauty of the architecture.

Mute by Eureka

Soft, colorful and sound absorbing downlight pendant is composed of twelve felt acoustic panels surrounding a custom LED light source distributing a uniform and direct light.

OPTIMIZE WITH CONTROLS

Use lighting controls to maximize energy savings, address code requirements, and increase occupant comfort, with a tailored solution to meet the needs of your higher education project. Choose networked lighting controls from nLight® for optimized building wide strategies or stand-alone lighting control solutions from SensorSwitch™ for single applications. Simplify specification and design by selecting nLight or SensorSwitch enabled luminaires available with embedded controls within the luminaire or integrated controls attached to the luminaire. Additionally, compatible controls are individually available for separate shipment and field installation.
