### Notes

- For ordering attached to an Acuity Brands lighting fixture, simply move the voltage before the ballast description and remove all other spaces from the OCS catalog number
- 120, 277, and 347 two neutral applications require the OCU to tap the second hot and neutral.
- 208, 240, 480, and 18/3G options have two selector switches for selection of any 2 of the 3 tap positions available

## OnePass® Cord Unselectable, OCU

Open Ceiling Lighting System

### ORDERING INFORMATION

	208    208V 240    240V 480    480V	For 208, 240, and 480 volts TAP12    Tap two hots; pin positions 1 & 2 (circuit 1) TAP34    Tap two hots; pin positions 3 & 4 (circuit 2) TAP1234    Tap four hots; pin positions 1, 2, 3 & 4 (circuits 1 & 2)		

### Notes

- For ordering attached to an Acuity Brands lighting fixture, simply move the voltage before the ballast description and remove all other spaces from the OCU catalog number (see examples above). Order OCU instead of OCS when one of these three conditions arise: five conductors are required to drop to the fixture, a second neutral is required in the fixture, or hot conductors in position 3 and 4 need to be tapped (The second circuit in a 208, 240, or 480 volt application).
- Tap position indicates the hot conductors pin position.
- Each configuration of TAP22N and TAP122N requires "12/4G 2N" or "10/4G 2N" OnePass components to complete a two neutral system.
