

A LOOK AT LED OUTDOOR AREA LIGHTING

DID YOU KNOW?

Typical imported knock-off LED fixtures can be enticing. But **DID YOU KNOW** that they may end up costing much more than you bargained for?

IMPORTS

INFERIOR OPTICS

Lumen output doesn't tell the whole story. Most import products do not provide adequate light distribution, resulting in dark areas and leaving owners liable in the case of an accident.

SHORT LIFE

Low-cost import products typically use many medium-power LEDs that have a life of only 50,000 hours (approximately 10 years of nighttime use).

INFERIOR LUMEN MAINTENANCE

Import products typically claim lumen maintenance of L70 / 50,000 hours. This means that the light output will fade by 30% over 10 years of use.

NO REPLACEMENT PARTS

Many import products use "no name" brand drivers and other integral components. Replacement parts are not typically available, making these fixtures non-serviceable.

INFERIOR SURGE PROTECTION

Many import outdoor products do not have separate and replaceable surge protection devices. Warranties do not cover failure due to surge.

LIGHT TRESPASS ISSUES

Most import area products have poor back-light and uplight control, resulting in light trespass and light pollution problems.

UNPROVEN WARRANTY & SUPPORT

Will this company be around to honor warranty & take care of issues on the job site?

DID YOU KNOW?

LITHONIA LIGHTING

PERFORMANCE OPTICS

Precision optics in Lithonia Lighting® LED area luminaires spread light evenly over the entire space, creating an environment that feels safer and more secure.

LONG LIFE

Lithonia Lighting® LED luminaires use high-power LEDs, with an exceptional expected service life of 20 years.

SUPERIOR LUMEN MAINTENANCE

With documented lumen maintenance of L92 / 100,000 hours, light output decreases by only 8% over 20 years of use for Lithonia luminaires, such as the RSX.

BRAND NAME COMPONENTS

Lithonia Lighting® outdoor luminaires use high-quality brand-name components that are readily available.

SURGE PROTECTION

Separate and replaceable surge protection devices are standard equipment in Lithonia Lighting® outdoor luminaires, protecting the drivers and light engines.

LIGHT TRESPASS CONTROL

With 0% uplight, limited backlight, and shielding options, Lithonia LED area luminaires satisfy the strict requirements of many municipalities.

TRUSTED & ESTABLISHED PARTNER

With a heritage of more than 75 years, Lithonia Lighting® is the most trusted brand in the lighting industry.
