

DESCRIPTION OF SERVICE

An Acuity Brands® Controls System enhanced documentation provides comprehensive system documentation for Acuity control systems. The documentation will include detailed programming and sequence of operation data per project specifications and code requirements.

System Documentation Notes

Contractor Responsibility

- Provide project specific information as requested to complete the document package
- Request documentation within required lead time (See general notes)

Acuity Responsibility

- Documentation will include:
 - Standard lighting controls device settings per room/zone (See example below)
 - Programming and settings for only Acuity Brands related lighting controls
 - Network Device settings backup data file generated by Acuity Brands proprietary software as applicable

General Notes

- Acuity Brands® requires a 12 business day notice to generate documents. Expedited service may incur additional charges.
- Enhanced System documentation is only as accurate as the information provided. Any changes in documentation requirements may incur additional charges.
- Service Request Form may be obtained through your Agent, Distributor, or by calling 1-800-535-2465 and selecting the Field Scheduling extension. A Service Request Form is required for Enhanced System documentation
- Services are subject to Field Service Terms and Conditions: <https://www.acuitybrands.com/-/media/abl/acuitybrands/images/support/customer-support/terms-and-conditions/acuity-brands-terms-and-conditions-for-field-services.pdf%20target=?forceBehavior=open>
- For Services Warranty: <https://www.acuitybrands.com/-/media/abl/acuitybrands/images/support/customer-support/terms-and-conditions/acuity-brands-technology-services-warranty.pdf>

Controls System Enhanced Documentation

ADDITIONAL SERVICES OFFERED: Please reach out to your Acuity Brands Agent or Distributor for information on additional services
