

# BLT Series Tunable White

The first tunable platform integrated into a mainstream digital control network

## Tunable White Lighting Solutions for the Classroom

Research<sup>1</sup> supports that lighting can have a positive effect on learning and attention. Lithonia Lighting® and Acuity Controls bring lighting adaptability in an easy-to-use plug & play platform. With simple elegance, nLight® delivers dimming and color tuning effects at the touch of a button.

Tunable White is perfect in classrooms and educational settings as it allows the light color temperature to be adjusted to the optimal light level for student tasks such as reading or test taking.

### Mainstream Dynamic Tunable White

Mainstream Dynamic brings exciting features once reserved for niche applications into everyday lighting systems. The Tunable white features allows for the inclusion of white light into various scenes—matching the optimal light for different activities.

When Tunable White is deployed on our nLight controls network, we call it **nTune**. This allows nLight to control lighting color temperature on the same network that manages motion detection, daylight harvesting and dimming. Customers can build a system of controls and luminaires that work seamlessly together.
