

Atrius™ LiveView

WHAT IS ATRIOUS LIVEVIEW?

Atrius LiveView is a real-time, web-based visualization interface that leverages data from Atrius Assets (indoor asset tracking and management) and Atrius Navigator (indoor positioning Software Development Kit). Atrius LiveView uses the last 60 minutes of your site's data to provide visualization of location, analysis and trends. Access to Atrius LiveView data is available through the web-based application interface or Atrius LiveView RESTful APIs to ingest data into an organically built or third-party software.

FEATURES

- Real-time visualization of Atrius Assets and Atrius Navigator device locations overlaid on your site map
- Access to RESTful APIs to incorporate Atrius LiveView data into enterprise or third-party software
- Analysis of asset movement and positioning
- Accurate device pathing
- Device utilization and trend analysis
- Alerts and notifications generated from user defined parameters
- Geo-fencing and zone monitoring
- Asset status and health indication (telemetry data)
- Supports several of the most popular internet browsers: Google Chrome™, Microsoft Edge™, Safari™

HOW DOES IT WORK?

Indoor position is collected using the Atrius™-Ready Sensory Network with either Atrius Assets, Atrius Navigator or a third-party positioning system. That data is processed, aggregated and stored in the Atrius cloud. Atrius LiveView leverages RESTful APIs to provide real-time visualization of device locations and metrics in the web-based application. The RESTful APIs can also be accessed directly to integrate the Atrius LiveView data into third party or organically built software.

For more information on Atrius Assets, Atrius Navigator or Atrius Insights, please see their associated product pages or contact your Atrius sales representative.

WHAT DO I NEED?

- Commissioned Atrius-Ready Sensory Network
- Atrius Admin¹ – system configuration tool
- License for Atrius Assets or Atrius Navigator
- Current floor space map ingested into the Atrius cloud
- Microsoft Azure Active Directory²

Notes:

1. Provided with Atrius Assets, Atrius Navigator or Atrius Insights license subscription.
2. Users of Microsoft® Office 365 will automatically have Microsoft Azure Active Directory.
