Time Delay Programming Instructions

1. Push and hold button until LED flashes rapidly (approximately 6 seconds). Release button.

2. Press button twice to enter Time Delay adjustment mode. The LED will flash back the current Time Delay setting according to below table (i.e. 5 flashes for 10 minute Time Delay).

3. Wait approximately 3 seconds

4. Press button the number of times for the desired setting (i.e., press twice for 2.5 minutes Time Delay).

5. LED will flash back this new setting, (repeated up to 10 times).

6. Press button down again until LED flashes rapidly (approximately 6 seconds). Release button.

7. Press button twice to verify Time Delay has been reprogrammed.

8. LED will flash back twice indicating acceptance of new setting
